The Work Calendar Table stores the pay periods, number of periods, the paid work days for each pay period, the annual total workdays, and the start and end dates for the work year. Every EDB assignment must be tied to a calendar. The calendar plays a significant role in time entry and payroll processing.

During payroll calculation, the system accesses the information from EDB, Salary/Pay Rate Screen (005), for the period being paid. After payroll processing, the transactions processed through pay calculation are posted to payroll history. The accuracy of the data on each work calendar is essential for the accuracy of the employee's payroll and the employee's retirement.

The purpose of a work calendar is to tell HRS:

- What accrual periods an employee is paid for
- How many days constitute a full month of work
- The first day of work for those tied to this calendar
- The last day of work for those tied to this calendar
- The total number of work days in a fiscal year for those tied to this calendar

Please refer to your HRS System Operations Manual, beginning on Page II-85, for more information on Work Calendar Tables.

Bulletins Related to Work Calendars

Each year in April and in May, the HRS Employee Services Unit sends out two bulletins regarding work calendars for the upcoming year.

- The bulletin posted in April, *Certificated Summer Session Payroll Cycles*, contains information on selecting the certificated summer session payroll schedules and building the work calendars for the upcoming summer session. These work calendars must be built before the first time report is produced for the summer session.
- The bulletin posted in May, *HRS Work Calendar Tables*, contains information on building the work calendars for the upcoming school year. These work calendars must be built before the first time report is produced for the fiscal year.

NOTE: Work calendars are specific to each fiscal year. They cannot be used to pay an employee for any other fiscal year.

SECTION II.

BUILDING A WORK CALENDAR

Intentionally left blank

Step 1 - Preparations to Building a Work Calendar

Step 1 – Preparations to Building a Work Calendar

There are five steps you will need to take before building a work calendar.

1. Determine which calendars need to be created for the upcoming fiscal year.
 - a. Search for a listing of your district's current and past work calendars from the Control Table Menu, Function 11 or 16. To search from the transaction menu,
 1. In the **action field**, type **S** to search.
 2. In the **TRANS field**, type **029** to go to the Work Calendar Table.
 3. Hit the **Enter key** on your keyboard.

- b. Order a listing of your district's calendars (last three years) using the Report Request Screen (039) in the Control Table Menu, Function 11 or 16. To request a report from the transaction menu,
 1. In the **TRANS field**, type **039** to go to the Report Request Screen.
 2. Hit the **Enter key** on your keyboard.

```

** CTL - REPORT REQUEST **                                1139

```

3. In the **Table Number field**, type **29** for Work Calendar.

4. Hit the **Enter key** on your keyboard.

The system prompts, “PLEASE REVIEW DATA ON SCREEN. OK TO PROCEED?”

5. In the **action field**, type **Y**.

6. Hit the **Enter key** on your keyboard.

The following day, this report will be posted to HRS Personnel Reports in Reports and Data (RAD). If you do not have access to this feature in RAD, please contact the SFS Security Unit at SFSecurity@laoe.edu.

c. Generate a report that lists calendars tied to active job assignments using PC Products-LLL or request a special ad hoc report through the HRS Operation and Security Unit. There is no charge to run an ad hoc report. For more information, please contact the following.

- PC Products - Letter, Lists, and Labels (LLL) - Linda Williams (562) 922-6535
- SFS Security – Email SFSecurity@laoe.edu.

2. Choose the master calendar from the list provided below as a template for each work calendar to be created. The table below lists the current master calendars. Please refer to your HRS System Operations Manual, Page II-89, for more information.

Master Calendar List

Pay Cycle	Type	Master Calendar No.
C1, C2, C3, C5, E1, E4	Calendar Month	1
H1	Half Month (1 – 15, 16 – end of month)	5
V1	Certificated Summer School (half month cycle)	6
V2	Certificated Summer School (full month cycle)	7

3. You will need to have:
- The description text for each calendar.
 - The number of “Hours per day” for each calendar.
 - Have a list of the accrual periods for each calendar.
 - A list of the number of paid work days for each accrual period for each calendar.
 - Have the first and last days of the work year for each calendar.
4. Determine the Number of Paid Work Days to enter into the calendars.
- Classified jobs - Work calendars should represent the total possible work days in the accrual period excluding weekends and including
 - Holidays,
 - Vacation days
 - Furlough days
 - Certificated jobs - Work calendars should represent the required or actual work days in the accrual period. It should not include holidays.

NOTE: Job type is based on the position not the employee.

C – WORK CALENDARS

5. Determine the dates that mark the beginning and ending of the work year for the employees tied to the work calendar.

- Example #1 ANNUAL: 07 01 16 06 30 17 12 MO Classified
- Example #2 ANNUAL: 08 22 16 05 26 17 10 MO Certificated
- Example #3 ANNUAL: 06 18 16 06 02 17 Summer Session

NOTE:

The beginning day of the work year must be in the first accrual period of the calendar while the last day must be in the last accrual period of the calendar.

May and June accrual periods for the next fiscal year should remain on the calendar if:

- The summer session is starting in May or June –or–
- There is a possibility a retro will be produced in the next fiscal year

Intentionally left blank

Step 2 - Build a Work Calendar

Step 2 - Build a Work Calendar

Each year, School Financial Services (SFS) builds Master Calendars that define the possible pay periods for all the pay cycles. Master calendars are used to build new calendars. Use Function 11, District Update Menu, to build new calendars. Here are the seven steps to building a work calendar.

1. Begin to build a new work calendar using Option A or Option B.

```

KEY 3: _____
DIST: 00011

MA b
NUM
21/027

Please refer to your HRS System Operations Manual, beginning on Page II-90, for descriptions of each field shown on the Work Calendar Table Screen.

3. In the **DESCRIPTION** field, enter **calendar's description**.
 - Up to 12 characters
 - Informational only

4. In the **HOURS PER DAY** field, enter the **number of hours worked per day**
 - Should be standard full time hours for a full-time employee
 - Informational only

5. Delete any accrual periods for which the group of employees tied to this calendar **will not be paid** including the zero on the Paid Work Days, Paid Non-Work Days, and Unpaid Days columns.

IMPORTANT: Summer sessions for certificated employees: For the last two or three months, the accrual periods with zeros in the Paid Work Days field should remain on the calendar. See examples [Pages 30 and 31](#).

6. For the remaining accrual periods, replace the zero in the Paid Work Days column with the number of paid work days for that accrual period. All accrual periods must have a value from 0 to 23. Classified and certificated work calendars are defined as follows.
 - **Classified calendars** should represent the possible work days in the accrual periods worked by the classified employees including holidays, vacation, and furlough days.
 - **Certificated calendars** should represent the required or actual work days in the accrual period. It should not include holidays.
7. In the **BEGIN DATE field** and the **END DATE field**, enter the dates that determine the beginning and ending work dates for those tied to this calendar.
8. Hit the **Enter key** on your keyboard to have the calendar edited.
 - If there are errors, HRS will highlight those errors. You will need to correct them and hit the Enter key on your keyboard to have the calendar edited again for errors.

If there are no errors, HRS will prompt, “PLEASE REVIEW DATA ON SCREEN. OK TO PROCEED?”

9. In the **action field**, type **Y** to save your calendar.

The process is now complete. You have now successfully built a work calendar. Since it is done in real time, your calendar is active and can now be used.

Step 3 – After Building Work Calendars

Step 3 - After Building Work Calendars

After building your work calendars, make sure the information on the work calendars is accurate. The accuracy is important because it is used to tell HRS:

- How many working days constitute a full accrual period
- The total number of working days in a fiscal year
- The first day and last day of work for those tied to this calendar

Also, HRS looks at the Salary/Pay Rate Screen (005) in EDB for the work calendar to use during retro transaction generation. It does not look at pay history.

IMPORTANT: As a safety precaution, we strongly recommend you review the accuracy of the data contained in the work calendars. You can search for a listing of your calendars using Function 11 or 16. Refer to the “Before Building a Work Calendar” section in this manual for more information on how to search for a work calendar. To access the detail screen for a specific work calendar from the transaction menu, refer to the “Build a Work Calendar” section in this manual.

NOTE: Work calendars are applicable for one fiscal year only.

SECTION III.

CHANGES TO EXISTING WORK CALENDARS

Intentionally left blank

Editing an Existing Work Calendar Table

Editing an Existing Work Calendar

Any of the fields that were input on a work calendar can be changed.

IMPORTANT:

Avoid making calendar code changes on the EDB or making changes in the paid workdays on the calendar after a time file has been generated and before the payroll has been produced. This can result in an employee receiving an incorrect pay.

If you change a work calendar after the fiscal year has started and the employee has started work, you will need to contact the SFS Retirement Unit to make sure the change does not adversely affect the employee's retirement.

1. Refer to the “Build a Work Calendar” section in this manual to access the detail screen from the transaction menu.

Work Calendar Table (AIMS029)

When a calendar is created, changed, or deleted, a Work Calendar Table Report (AIMS029) is generated for all affected calendars. This report is posted to HRS Personnel Reports in RAD. If you do not have access to this feature in RAD, please contact the HRS Operations and Security Unit at SFSSecurity@laoe.edu.
